Founded in 1991, Anthem is a team of 500 people driven by creativity, passion and direct communication. Anthem has invested in, developed or managed – alone or in partnership – more than 320 residential, commercial and retail projects across western North America.

Our growing residential portfolio includes 20,500 homes that are complete, in design or under construction, from master planned mixed use residential and multifamily, to townhome, rental and single family communities.

We own, co-own, manage or have previously owned over 9 million square feet of retail, industrial and office space. We have developed more than 60 communities across 8,500 acres of land in Alberta, British Columbia and California.

Anthem is a real estate development, investment and management company that strives, solves and evolves to create better spaces and stronger communities.

We are Growing Places.

Big Lake Guide

Benefits of a natural landscape

Enjoy nature while knowing your neighbourhoods are preserving it. With eight ponds and wetland areas dotting the communities, you'll have the opportunity to spot birds, deer, moose, and other wildlife.

Animals are as much a part of Big Lake as we are. To help minimize the risk to wild animals in our communities, wildlife corridors have been set up to safeguard animals against the danger of vehicles. These corridors provide safe passage for animals and prevent excessive human-wildlife interaction, keeping all residents of Big Lake safe.

Let the stars shine, gaze at the night sky from your deck, counting shooting stars and finding constellations. With the installation of low-light LED streetlamps.

Bioswales

Preserving nature is just as important as appreciating it. Trumpeter, Kinglet, and Hawks Ridge are low Impact Developments – respectfully created in tune with nature, intentionally designed for a low ecological footprint. Medians and parks are planted with wild, native flora – called bioswales – aid in water filtration, air purification, and echo the beauty found throughout the Big Lake natural area.

Water is essential to life

– not only ours, but the environment and animals within it.

At Big Lake, we've dedicated space to constructed wetlands and ponds throughout the community. Another chance to ensure we protect the nature we life in, these wetlands also provide essential areas for animals such as beavers, deer, and bird species.
